

Nevadaworks 2026 Industry Engagement Calendar

Nevadaworks will host
three distinct meeting
formats in 2026

- ***Industry Sector Partnership (ISP):***
 - **Frequency:** Semi-annual (in-person)
 - **Participants:** Industry Partners (employers), workforce system stakeholders
 - **Objective:** Bring together employers for each priority sector to identify workforce challenges, skills gaps, and emerging priorities. These in-person events will support data-driven decision-making to scale contextualized solutions and interventions by providing a structured environment for intentional discussions and collaboration. Guest speakers, employer panels, and sector experts may be invited to share insights on trends, best practices, and regional workforce needs.

- ***Industry Pulse Meeting (IPM):***
 - **Frequency:** Bi-monthly (virtual)
 - **Participants:** Industry Partners (employers), workforce system stakeholders
 - **Objective:** Offering employers a virtual platform to stay aligned on regional workforce activity between ISP convenings. These sessions focus on timely updates, including hiring trends, programmatic updates, project timelines, investigation into emerging sub-sectors, and special research topics. While streamlined, these meetings ensure continuous touch points, enabling Nevadaworks and employers to quickly surface needs and maintain momentum on workforce initiatives.

- ***Core Partnership Retrospective (CPR):***
 - **Frequency:** One week following each ISP and IPM convening
 - **Participants:** Workforce system stakeholders, including education and training providers, Community Based Organizations, government agencies, economic development partners
 - **Objective:** Serves as a structured debrief session for workforce stakeholders following each employer-facing meeting. CPR meetings focus on reviewing key themes, concerns, recommendations, and opportunities identified by employers during the ISP and IPM convenings. Partners collaborate to develop coordinated action plans, assign responsibilities, and establish timelines to address employer needs and sector priorities

First Quarter

LB: Lithium Battery Lifecycle

AM: Advanced Manufacturing

LT: Logistics & Transportation

HC: Healthcare

CI: Construction & Infrastructure

January 2026
